Test de linealidad aérea:

En este test se busca encontrar la linealidad del test aéreo de 60 a 20 dBHL en todas sus frecuencias a pasos de 5 dBHL.

| 125 Hz | 250 Hz | 500 Hz | 750 Hz | 1000 Hz | 1500 Hz | 2000 Hz | 3000 Hz | 4000 Hz | 6000 Hz | 8000 Hz |
|--------|--------|--------|--------|---------|---------|---------|---------|---------|---------|---------|
| -46.0 | -26.0 | -26.0 | -10.0 | 65.0 | -23.0 | -25.0 | -6.0 | -42.0 | -34.0 | -30.0 |
| -37.0 | -26.0 | -23.0 | -9.0 | 65.0 | -24.0 | -30.0 | -5.0 | -26.0 | -38.0 | -31.0 |
| -32.0 | -33.0 | -17.0 | -11.0 | 65.0 | -21.0 | -33.0 | -5.0 | -32.0 | -33.0 | -21.0 |
| -36.0 | -30.0 | -19.0 | -12.0 | 65.0 | -19.0 | -39.0 | -4.0 | -34.0 | -25.0 | -27.0 |
| -41.0 | -30.0 | -19.0 | -11.0 | 65.0 | -20.0 | -56.0 | -4.0 | -36.0 | -37.0 | -40.0 |
| -41.0 | -24.0 | -20.0 | -10.0 | 65.0 | -21.0 | -31.0 | -6.0 | -27.0 | -30.0 | -31.0 |
| -49.0 | -27.0 | -26.0 | -9.0 | 65.0 | -24.0 | -29.0 | -6.0 | -26.0 | -31.0 | -23.0 |
| -34.0 | -29.0 | -22.0 | -9.0 | 65.0 | -23.0 | -25.0 | -6.0 | -31.0 | -32.0 | -20.0 |
| -33.0 | -29.0 | -18.0 | -11.0 | 65.0 | -20.0 | -27.0 | -5.0 | -33.0 | -28.0 | -35.0 |

Test de linealidad ósea:

En este test se busca encontrar la linealidad del test óseo de 30 a -10 dBHL, en todas sus frecuencias a pasos de 5 dBHL.

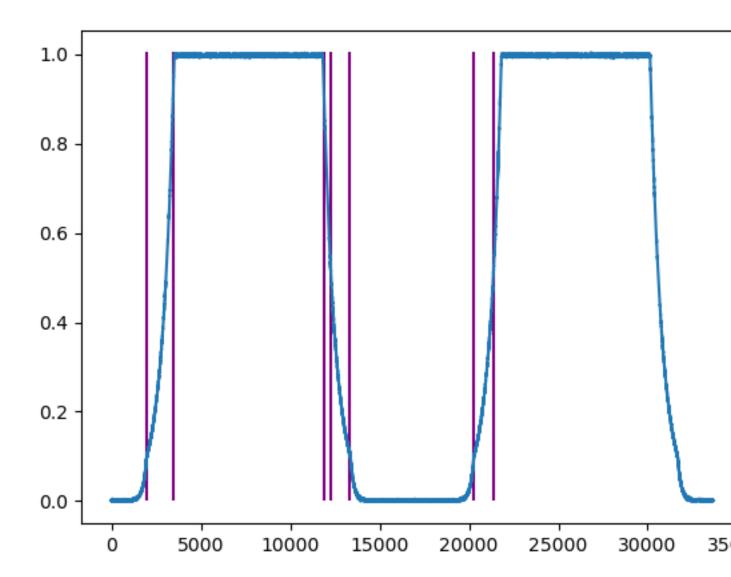

| 250 Hz | 500 Hz | 750 Hz | 1000 Hz | 1500 Hz | 2000 Hz | 3000 Hz | 4000 Hz |
|--------|--------|--------|---------|---------|---------|---------|---------|
| 193.0 | 433.0 | 695.0 | 1018.0 | 1435.0 | 1933.0 | 2946.0 | 3914.0 |
| 191.0 | 436.0 | 695.0 | 1018.0 | 1434.0 | 1933.0 | 2947.0 | 3915.0 |
| 189.0 | 440.0 | 695.0 | 1018.0 | 1437.0 | 1933.0 | 2947.0 | 3908.0 |
| 184.0 | 443.0 | 693.0 | 1018.0 | 1436.0 | 1915.0 | 2947.0 | 3914.0 |
| 185.0 | 442.0 | 692.0 | 1018.0 | 1438.0 | 1930.0 | 2947.0 | 3912.0 |
| 194.0 | 438.0 | 694.0 | 1018.0 | 1436.0 | 1931.0 | 2947.0 | 3907.0 |
| 191.0 | 435.0 | 695.0 | 1018.0 | 1434.0 | 1929.0 | 2947.0 | 3912.0 |
| 188.0 | 439.0 | 695.0 | 1018.0 | 1434.0 | 1933.0 | 2946.0 | 3922.0 |
| 182.0 | 442.0 | 694.0 | 1018.0 | 1437.0 | 1931.0 | 2946.0 | 3916.0 |

Test de tono pulsante:

En este test se busca encontrar los tiempos de Rise time, Fall time, On time y On/Off time del tono pulsante.

| 7 | Tiempos [ms] | : Resultado |
|---|--------------|-------------|
| | Rise time | 32.97 |
| | Fall time | 32.95 |
| | On time | 191.52 |
| | On/Off time | 205.62 |

Test de nivel vocal:

Para este test se grabaran a 85 dBHL el conjunto de palabras sin silencio de las listas:

- * Dr. Tato adultos
- * Dr. Tato niños
- * SRT E IRF (masculino)
- * SRT E IRF (femenino)
- * Audicom

| | Lista Ni | vel vocal [dBH | L] |
|-----|------------------------|-------------------------|-----|
| [| r. Tato adult o | 93300551176 | 071 |
| | Dr. Tato niñ 69 | .93299336731 | 434 |
| SRT | E IRF (mass@u | 982 994224131 | 107 |
| SR | E IRF (femels | ir 93)298662453 | 89 |
| | Audicom19 | .93298353999 | 853 |

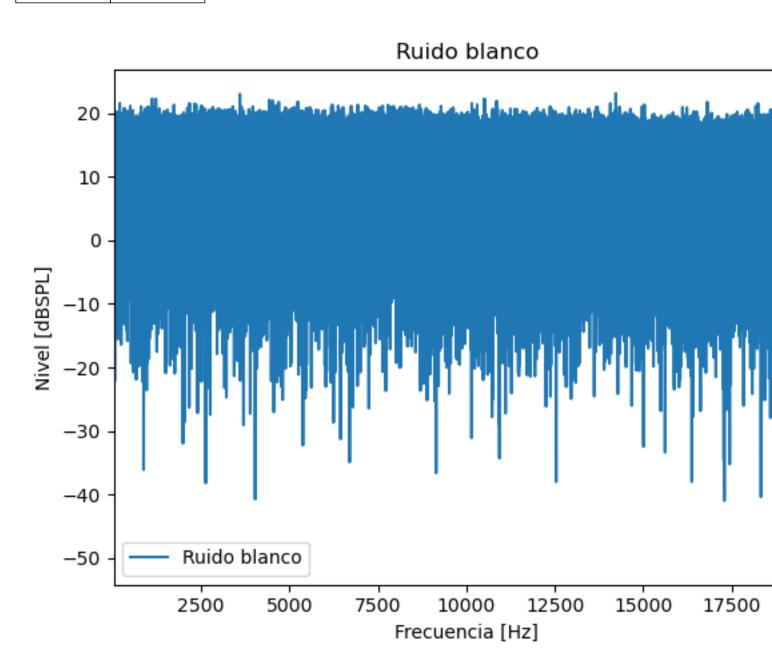

Test de respuesta en frecuencia: (A venir)

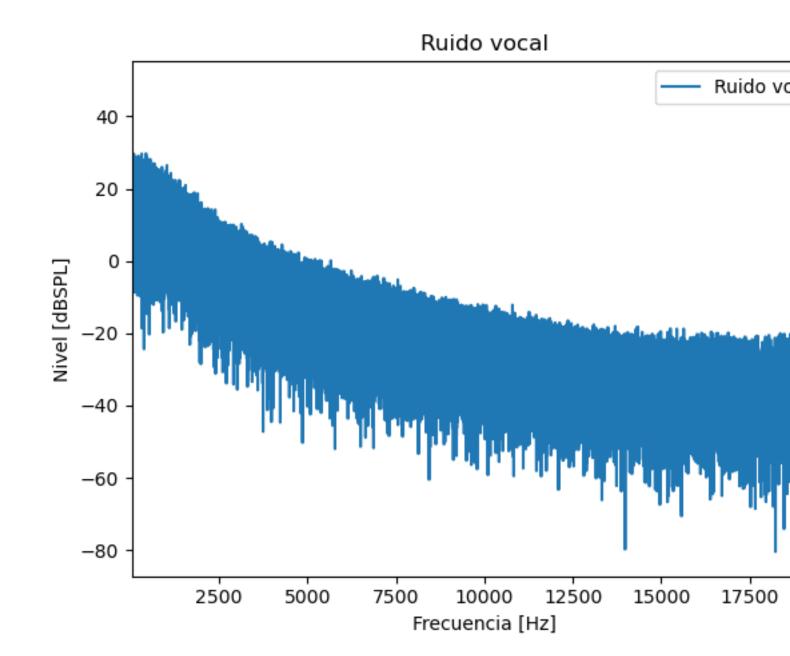

Test de ruido:

Para este test se graban a 70 dBHL 3 tipos de ruido: Blanco, Vocal y NBN a 1kHz. Para su representación, se observa una tabla con los valores obtenidos y la respuesta en frecuencia de cada uno.

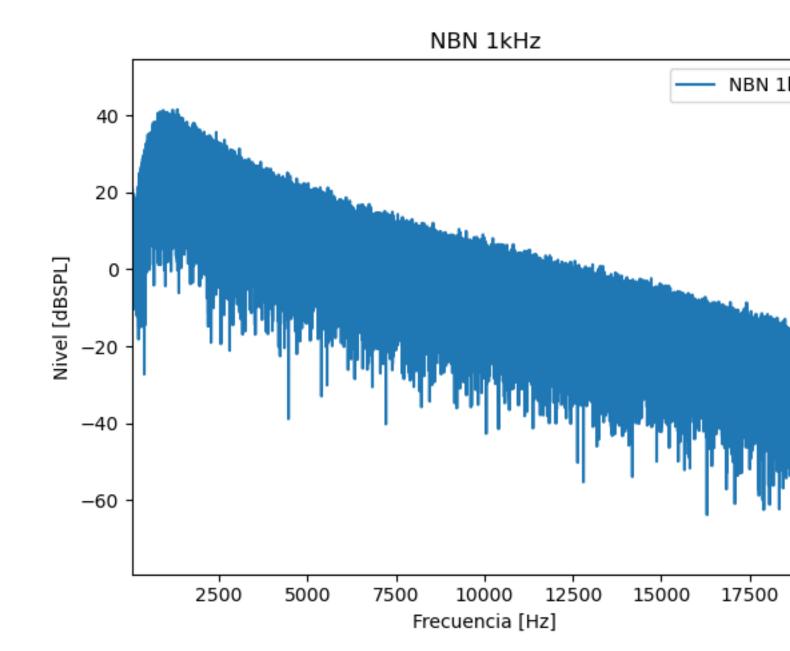

| Tipo | Nivel [dBSPL] |
|--------------|---------------|
| Ruido blanco | 0.03572923 |
| Ruido vocal | 0.02950366 |
| NBN 1kHz | 0.096742496 |

Test de warble Tone:

Para este test se buscan las frecuencia de mensaje y moduladora del Warble Tone.

Carrier frequency [Hz]

| 125.0 | 1.5 |
|--------|-----|
| 250.0 | 1.5 |
| 500.0 | 1.5 |
| 750.0 | 1.5 |
| 1000.0 | 1.0 |
| 1500.0 | 1.5 |
| 2000.0 | 1.0 |
| 3000.0 | 1.0 |
| 4000.0 | 1.0 |
| nan | 1.0 |
| 8000.0 | 1.0 |
